GLOVO PRODUCT TEAM · FEATURE PITCH · GROUP 3 · IE IMBA DATA FLUENCY

Ship the healthy default. Keep the basket.

Three screens. Zero lost revenue. 336 kg less sugar a month in Madrid.

→ PRESS RIGHT TO START

THE ONE SENTENCE · KNAFLIC'S "BIG IDEA"

The order flow decides what Madrid eats. Three screens cut the sugar and keep every euro.

That is the pitch. The next slides are the evidence, then the build.

→ PRESS RIGHT TO START

ONE ORDER ON OUR APP

A Big Mac menu with Coke. €9.30.

The Coke in that order is **14 sugar cubes**. One cube is 4 g.

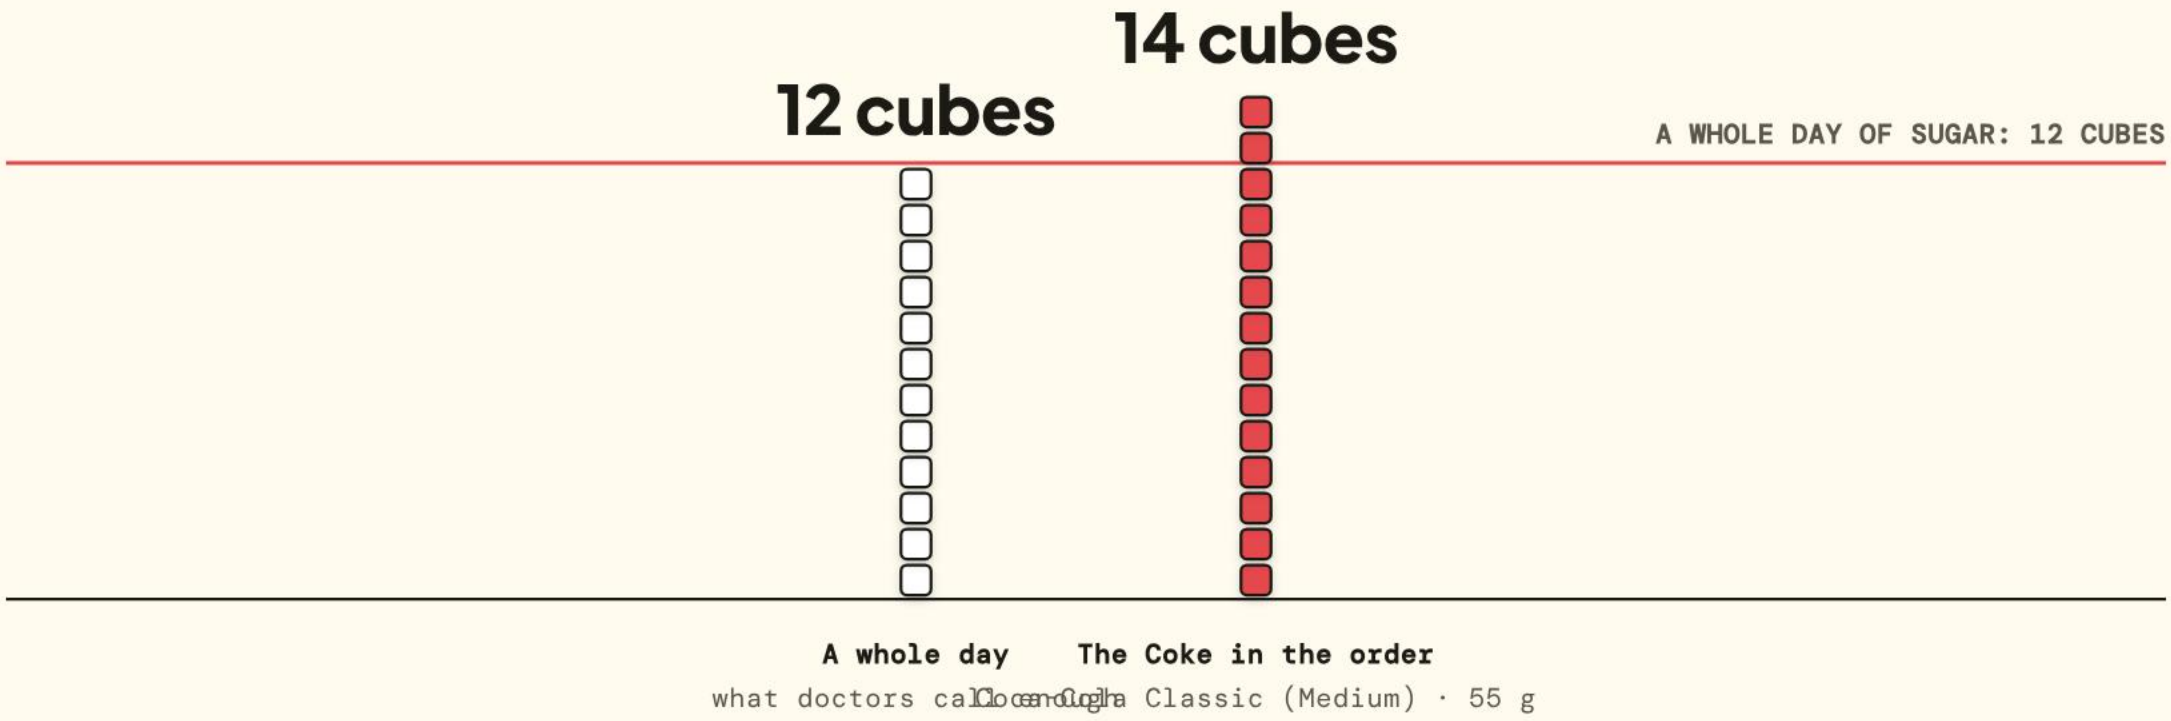

→ SEE IT IN THE DATA

A Big Mac menu with Coke. €9.30.

HOW TO READ · 1 CUBE = 4 G OF SUGAR · TALLER STACK = MORE SUGAR

Effort	re-sort the rail

CONCEPT SCREENS · PRICES GLOVO MADRID · GLOVO FEE ASSUMED 30 % · EFFORT ESTIMATES ARE OURS

FAIR BY DESIGN

Healthy, not sneaky.

Nothing pre-ticked. Same-size buttons. Ads say ad.
The law already says so, and so does our brand.

→ SEE IT IN THE DATA

RULE 1 · EU CONSUMER RIGHTS DIRECTIVE ART. 22

Never pre-tick

The healthy option is shown first, never chosen for them.

RULE 2 · DIGITAL SERVICES ACT ART. 25

Same-size buttons

No dark patterns. Both choices get the same tap target.

RULE 3 · DIGITAL SERVICES ACT ART. 26

Ads say "ad"

When McDonald's pays for the Better Menu tile, the user sees the label.

SCALE

Only a few need to say yes.

One million orders a month. If **2 in 100** switch to Zero and 5 in 100 add a side: **336 kg** less sugar, **€45,500** more for the partner, **€19,500** more for Glovo.

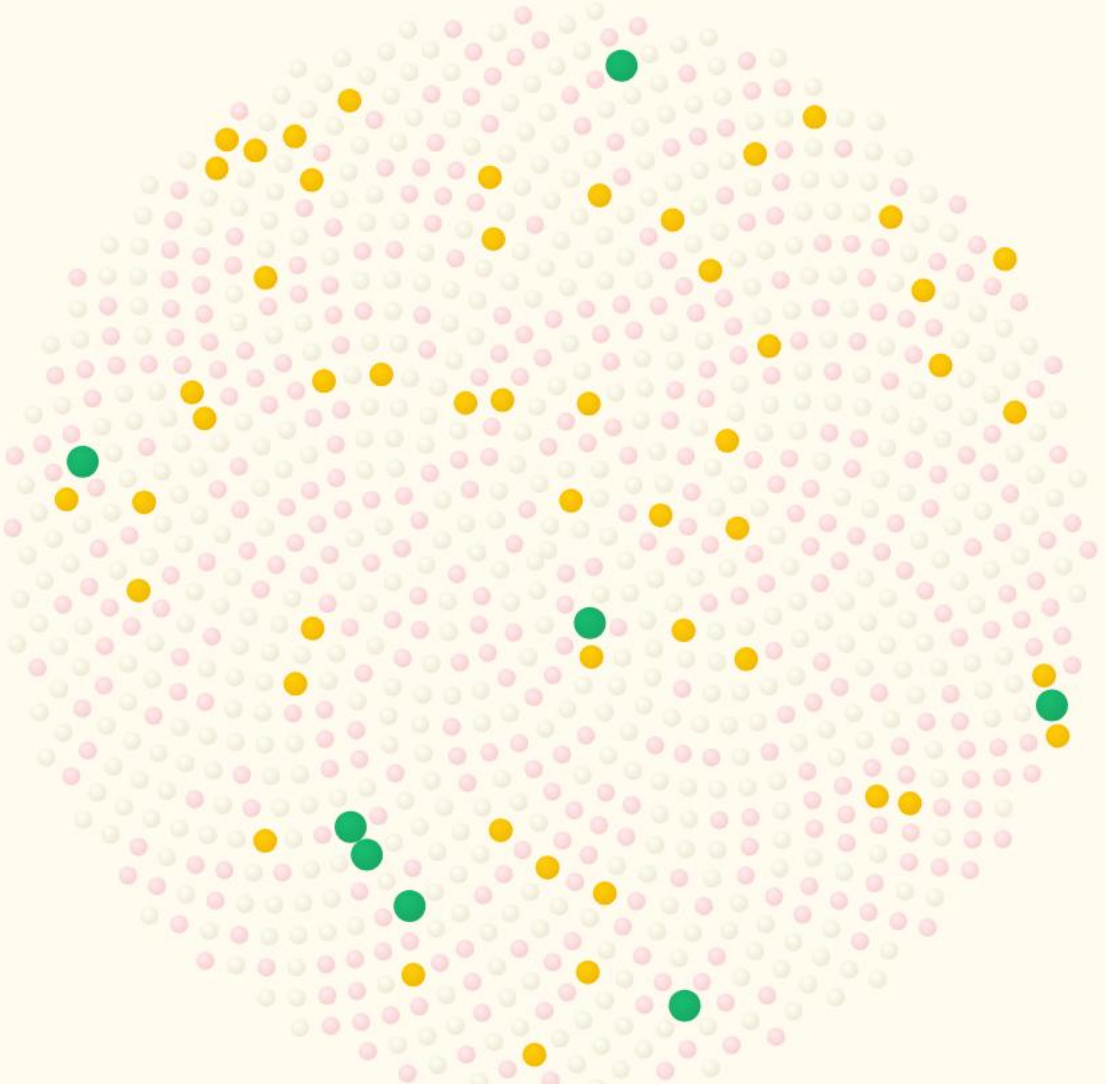

→ SEE IT IN THE DATA

Only a few need to say yes.

HOW TO READ · ONE DOT = 1,000 ORDERS

€19,500

MORE FOR GLOVO, PER MONTH

ONE MONTH OF ORDERS · 1 DOT = 1,000 ORDERS

- has a sugary drink
- picked Zero instead
- added fruit or veg
- 1 dot = 1,000 orders

OUR GUESSES, NOT DATA: 1,000,000 ORDERS · 40 % INCLUDE A SUGARY DRINK · 2 % OF THOSE PICK ZERO · 5 % ADD A €1.30 SIDE · 30 % COMMISSION · THE TEST REPLACES THESE

THE EXPERIMENT

A/B it for four weeks.

Half of Madrid orders get the three screens. Half don't. Basket value is the guardrail.

→ SEE IT IN THE DATA

ONE MONTH OF ORDERS · 1 DOT = 1,000 ORDERS

HYPOTHESIS

If Zero is shown first, a Reorder-with-Zero button exists, and fruit sits at the top of the add-on rail,

then basket value stays the same or grows and the share of sugary drinks falls,

because the healthy choice costs nothing extra and is finally visible.

METRICS · 4 WEEKS · MADRID · 50/50 SPLIT

Primary: average basket value (guardrail: must not drop).

Secondary: share of orders with Zero; share with a fruit or veg add-on.

Retention: 30-day reorder rate after "nice pick!".

Guardrail: checkout time, support tickets.

WHAT WE DON'T KNOW YET

Sales mix. The menu data has no volumes. The test fixes that.

Our inputs are guesses. 40 % of orders include a sugary drink, 2 % switch, 5 % add a side, 30 % commission.

US menu as proxy. Spain's list is shorter; the pattern is the same. Swap in the Spanish nutrition file before launch.

DATA: NUTRITION FACTS FOR MCDONALD'S MENU (KAGGLE, US, 260 ITEMS) · 1 CUBE = 4 G OF SUGAR · US MENU USED AS A STAND-IN FOR MADRID

CHARACTERS

Glovo product team, McDonald's, a million Madrid orders

SETTING

260 menu items, measured in sugar cubes

CONFLICT

Healthy usually shrinks the basket
