FILED BY GUATEMALA'S 18.4 MILLION RESIDENTS IN 2024. NOT EIGHT THOUSAND.

Eight patents

What Mexico and Central America stopped buying, and what it cost them

Growth diagnostic for the IDB · one subregion, different binding constraints

Group 1 · [Consulting firm] · IE University
[Presenter 1] · [Presenter 2] · [Presenter 3] · [Presenter 4] · [Presenter 5]

12 November 2026

One subregion, different binding constraints.

Seven economies, four stories. The money should follow the constraint, not the map.

3

PROGRAMMES, ONE ASK: FUND LINKAGES AND FORMALISATION IN MEXICO, STARTING IN 2027

KEY

Evidence on slides 3 to 11, benchmarks on 12 to 13, programmes on 14 to 17.

GROUP	BINDING CONSTRAINT	WHAT FITS
Mexico	Missing supplier linkages and the informality wedge	**Linkages and formalisation**
Northern Triangle and Nicaragua	State capacity and violence; people are the main export	**Revenue, security and connectivity**
Costa Rica	Contrast: grew on FDI plus skills, without R&D or patents	**The model for capability-building**
Panama	Contrast: fast growth on services, low tax, high informality	**Growth that was not inclusive**

the money should follow the constraint, not the map

Seven economies, four different stories.

Informality, tax, remittances and skills, against the OECD.

~25%

OF GDP IS MONEY SENT HOME, IN HONDURAS, EL SALVADOR AND NICARAGUA

KEY

Darker cells sit further behind the Latin American average. Costa Rica and Panama break the pattern in different ways.

	INFORMAL JOBS %	TAX % OF GDP	REMITTANCES % GDP	PISA MATHS
Mexico	55.5	17.7	3.7	395
Guatemala	83.2	14.0	19.1	344
Honduras	82.6	21.0	25.7	n.t.
El Salvador	66.5	22.8	24.3	343
Nicaragua	63.0	27.5	26.6	n.t.
Costa Rica	37.4	24.9	0.7	385
Panama	58.7	11.9	0.6	357
OECD		34.0		472

darker cells sit further behind the Latin American average

ILOSTAT · Revenue Statistics in LAC 2025 (2023 data) · WDI remittances 2024 · OECD PISA 2022

Since 1990, Mexico has grown slowest of all.

Real income per person, average annual growth, 1990 to 2024.

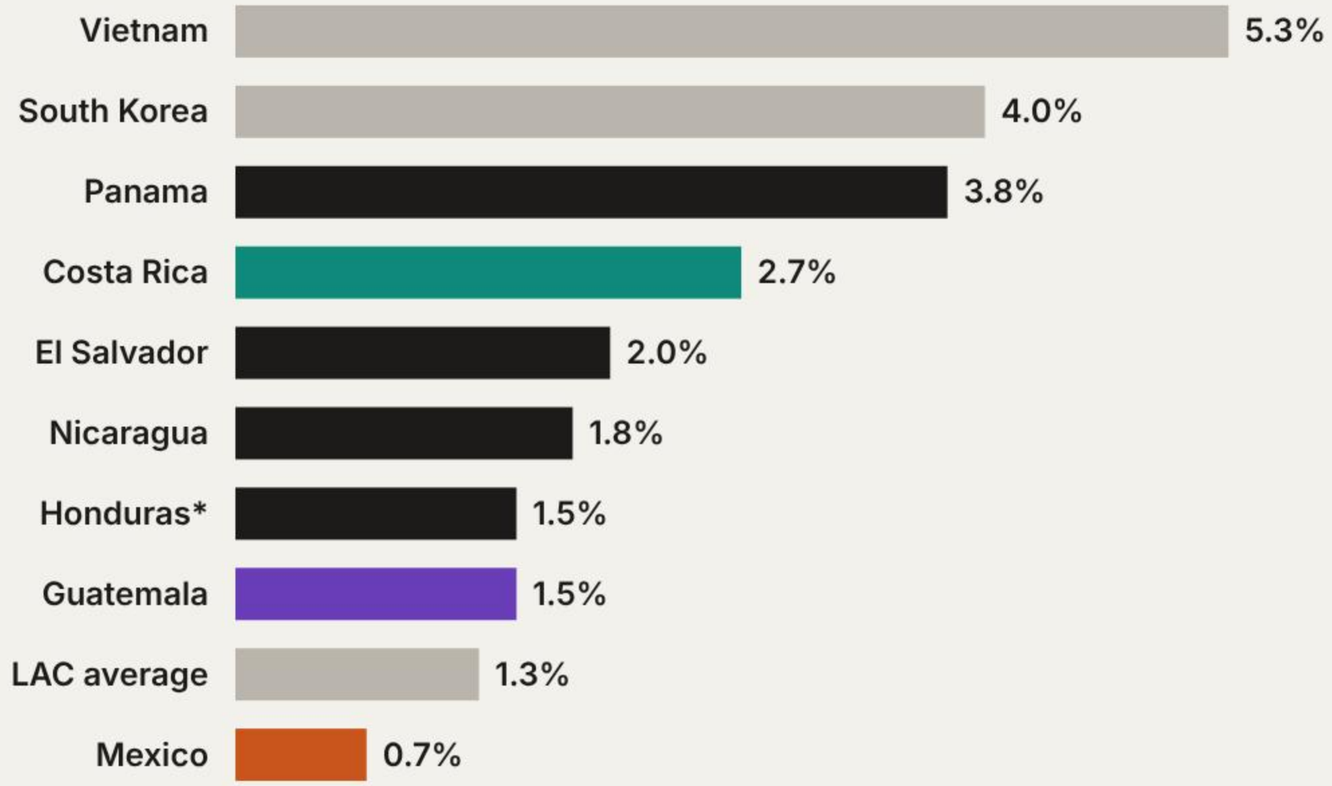

0.7%

A YEAR: MEXICO'S GROWTH IN INCOME PER PERSON SINCE 1990. VIETNAM: 5.3%

KEY

Grey bars are benchmarks outside the subregion. Panama grew fastest in the subregion, on services. Costa Rica came second.

REAL INCOME PER PERSON, AVERAGE ANNUAL GROWTH, 1990 TO 2024

grey bars are benchmarks outside the subregion

World Bank WDI, NY.GDP.PCAP.KD, 1990 to 2024, compound annual rate · Honduras from 2000 (series break)

Latin America did not lack machines. It used them less well.

Total factor productivity as a share of the US level, 1960 and 2013.

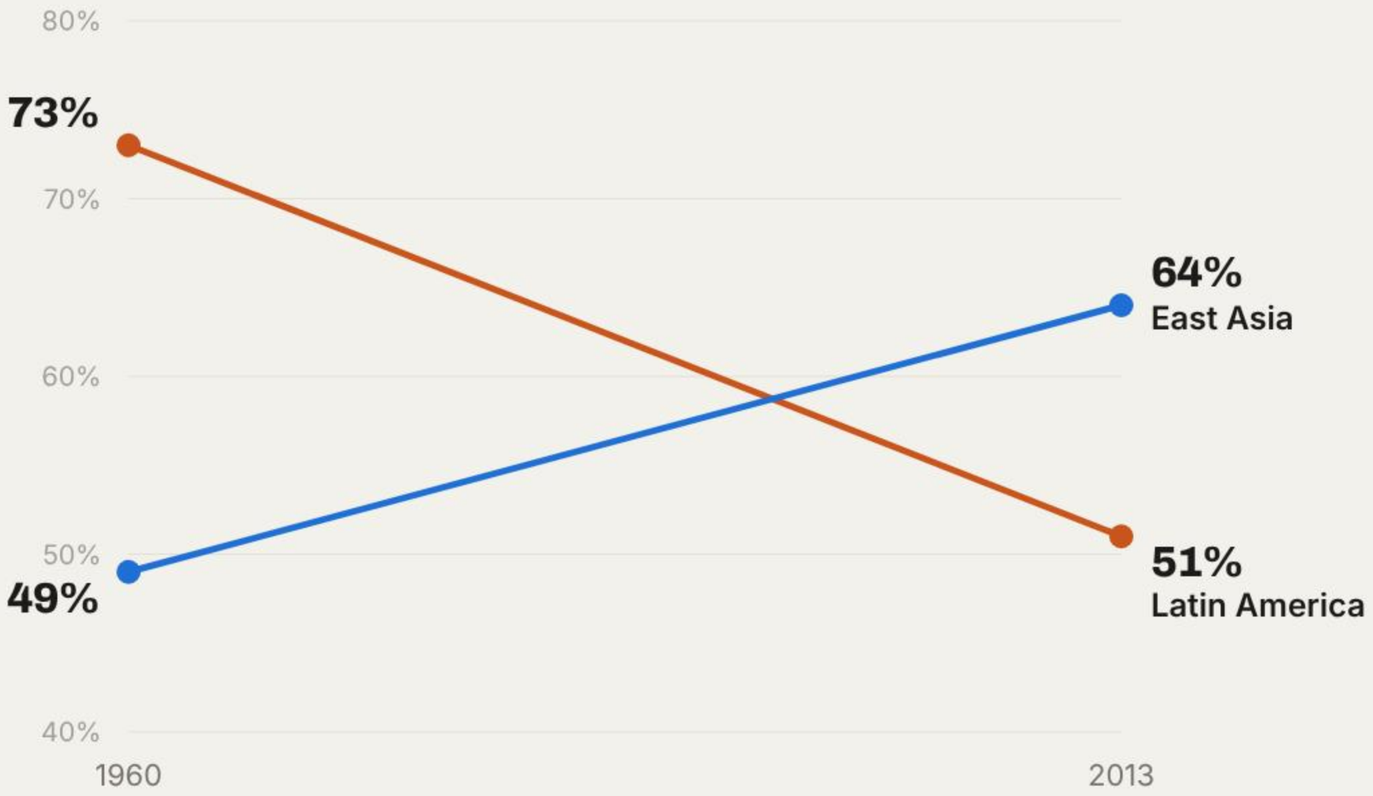

54%

RICHER, HAD PRODUCTIVITY SIMPLY KEPT PACE WITH THE US

KEY

Two lines, two regions. Chile is the only country in Latin America that closed any of the gap.

TOTAL FACTOR PRODUCTIVITY, % OF THE US LEVEL

Chile is the only country in the region that closed any of the gap

Grazzi and Pietrobelli (IDB, 2016) · Pagés (IDB, 2010) · Penn World Table 10.01

Patents tell the same story, more starkly.

Resident patent applications per million people, 2024.

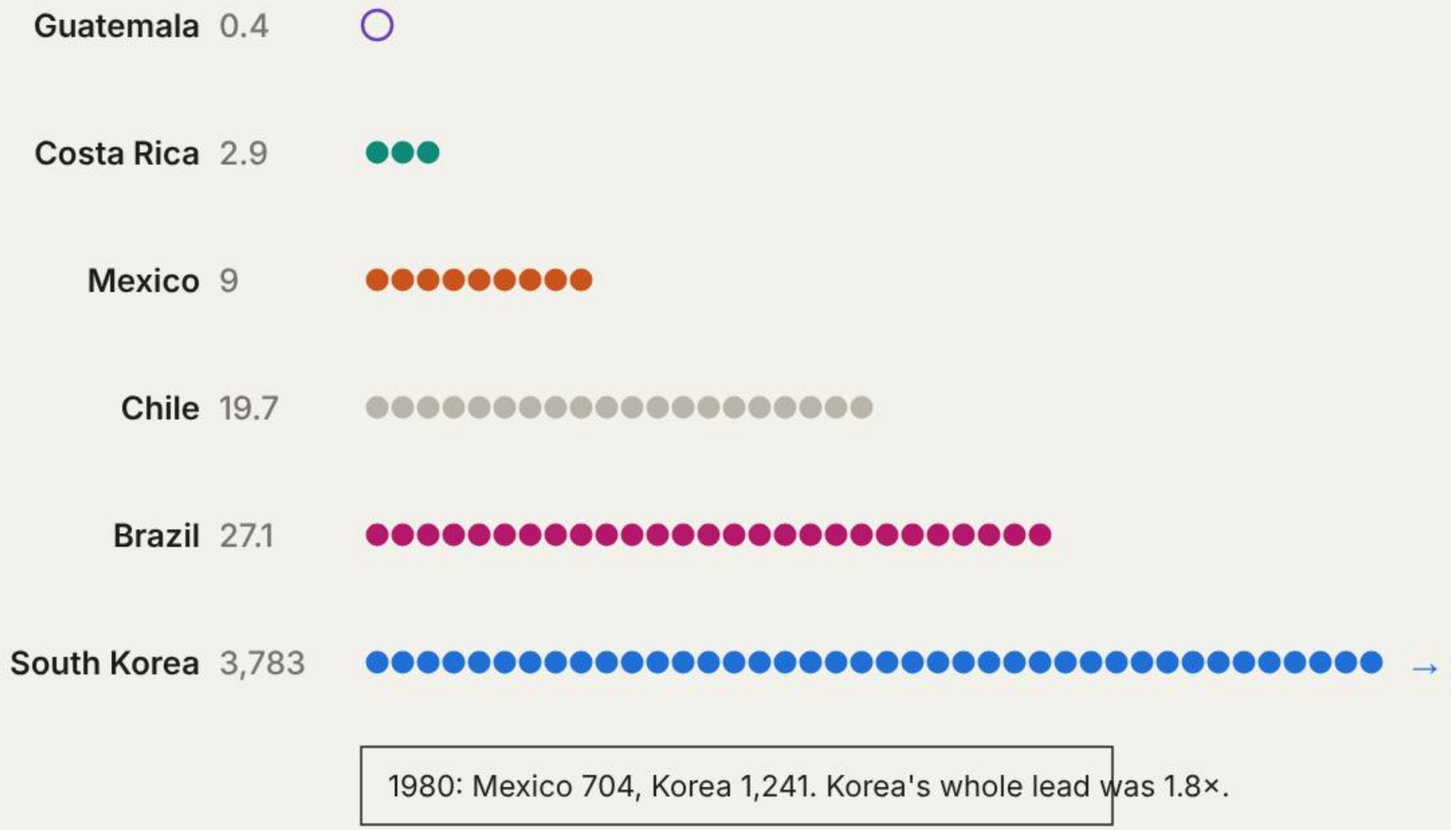

420×

KOREA'S RESIDENT PATENTS PER PERSON AGAINST MEXICO'S. AGAINST GUATEMALA: 8,704×

KEY

One dot is one patent per million people. Guatemala's is hollow because it is less than one. Patents undercount invention, since multinationals file abroad; we use them as one signal, not the measure.

RESIDENT PATENTS PER MILLION PEOPLE, 2024 · 1 DOT = 1 PER MILLION

Korea's row keeps going for another 55 slide widths

World Bank WDI, IP.PAT.RESD and SP.POP.TOTL, 2024 · retrieved 17 Oct 2026

Same test, different verdicts for Mexico and Guatemala.

Four candidate constraints, one indicator each, scored against the Latin American average.

1 vs 3

CONSTRAINTS THAT CLEARLY BIND, IN MEXICO AGAINST GUATEMALA. FINANCE BINDS IN NEITHER

KEY

Mexico's binding constraint is appropriability: informality and missing supplier links. Guatemala's is the state itself.

CONSTRAINT	INDICATOR	MEXICO	GUATEMALA	LAC
Finance	Private credit, % of GDP · lending spread, points	**35.5 · 6.2** Does not bind	**37.2 · 7.7** Does not bind	52.9 · 6.1
Human capital	PISA 2022 maths score (OECD 472)	**395** Partly binds	**344** Binds	n/a
Infrastructure	Logistics index, 1 to 5 · electricity access, %	**2.9 · 99.8** Does not bind	**2.6 · 90.9** Binds	2.7 · 98.0
Appropriability	Informal jobs % · homicides per 100k · tax % of GDP	**55.5 · 19.3 · 17.7** Binds	**83.2 · 16.1 · 14.0** Binds	n/a · 20.2 · 21.3

finance is not the problem in either country. what is missing differs.

Framework after Hausmann, Rodrik and Velasco (2005) · WDI FS.AST.PRVT.GD.ZS, FR.INR.LNDP 2025; LP.LPI.OVRL.XQ 2022; EG.ELC.ACCS.ZS 2024 · OECD PISA 2022 · ILOSTAT · InSight Crime 2024 · Revenue ...

In Mexico, every formal hire carries a tax, so firms stay small.

So firms stay small, stay hidden, and never learn to grow.

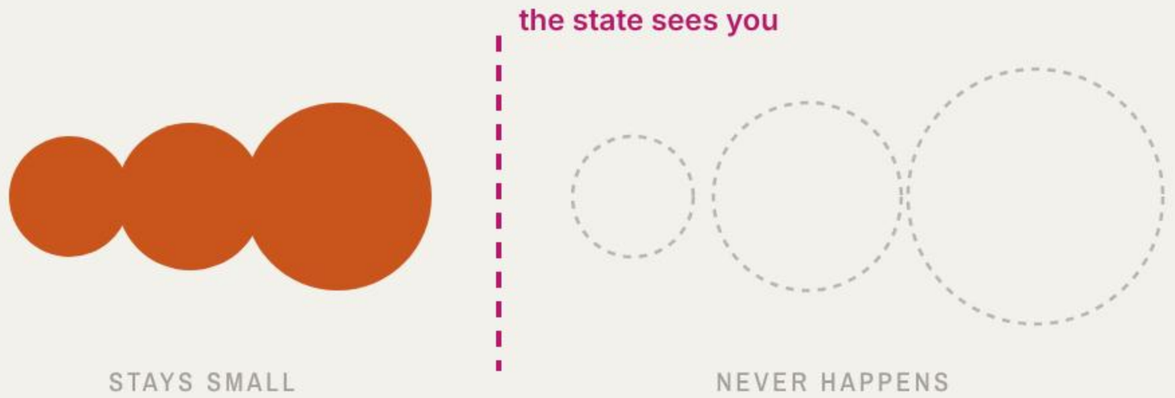

55%

OF MEXICAN WORKERS ARE INFORMAL. COSTA RICA: 37%. GUATEMALA: 83%

KEY

Solid circles are the firm today. The dashed line is the moment the state can see it. Hollow circles are the growth that never comes. Levy puts the efficiency cost at 0.9% to 1.44% of GDP every year.

WHY FIRMS NEVER GET BIG

INFORMAL SHARE OF WORKERS, ILO HARMONISED

about half the workforce lives to the left of that line

ILOSTAT, latest year · mechanism after Levy (2008)

The export poles buy abroad, and the south is left out.

What Mexico exports is complex. The capability that makes it sits abroad.

>70%

OF THE INPUTS USED BY MEXICO'S EXPORT FACTORIES ARE IMPORTED, EVERY YEAR SINCE 2013

KEY

Mexico ranks 17th in economic complexity, yet its export factories buy fewer than 30% of inputs at home. Nuevo León's factories make 39% of all domestic IMMEX purchases. Chiapas, on the southern border, has six times its poverty rate.

IMMEX INPUTS, 2024

Economic Complexity Index:
Mexico ranks 17th of 133.
The capability sits abroad.

MULTIDIMENSIONAL POVERTY, % OF PEOPLE, 2024

Nuevo León's export factories buy 39% of all domestic inputs purchased by Mexico's IMMEX firms.

a factory that imports its parts exports wages, not know-how

Harvard Growth Lab, Atlas of Economic Complexity · INEGI IMMEX 2024 · INEGI poverty 2024 · El Financiero (2023) on IMMEX · Perroux, Myrdal, Hirschman

In the Northern Triangle, the state is too thin to provide the basics.

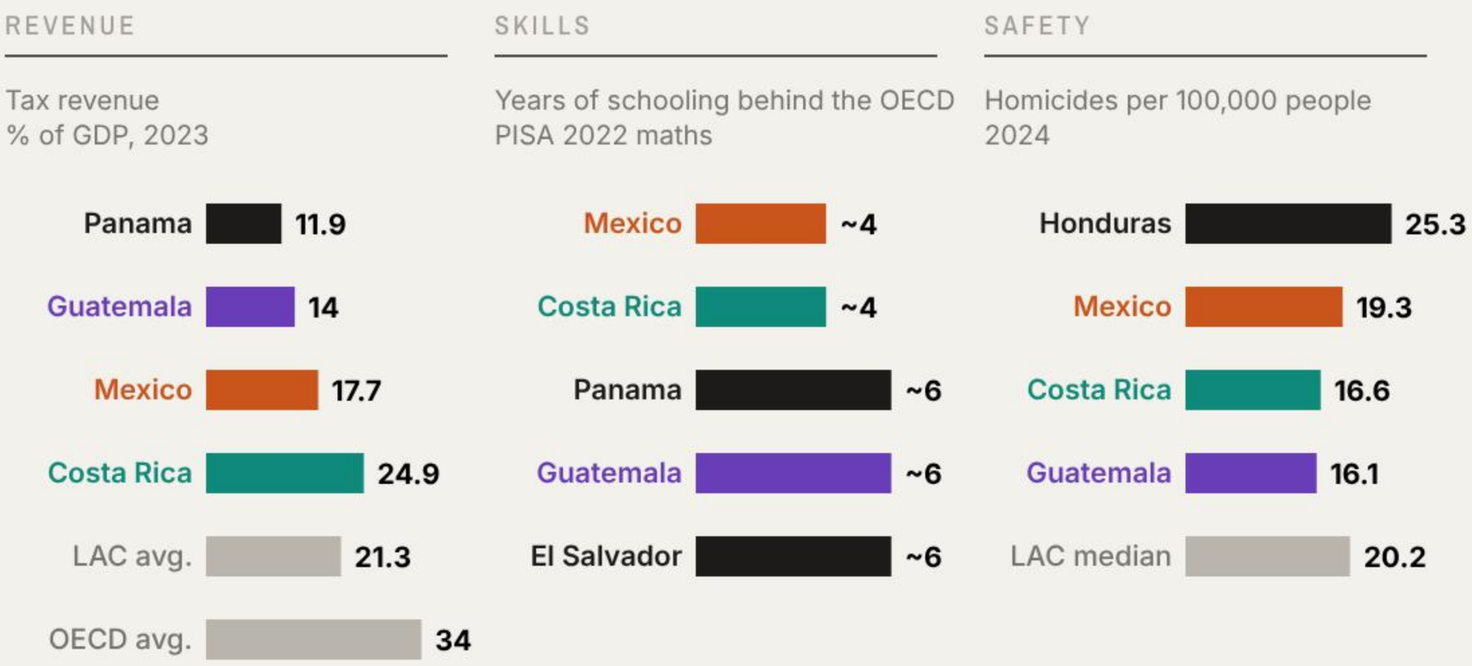

Revenue, skills and safety, against the region and the OECD.

14%

GUATEMALA'S TAX TAKE, % OF GDP. LATIN AMERICA: 21.3%. OECD: 34%

KEY

Violence works as a second, private tax on growth, and it falls hardest on the periphery. Twenty PISA points equal about one school year.

violence works as a second, private tax on growth

Revenue Statistics in LAC 2025 · IDB on PISA 2022 · InSight Crime 2024

Growth has not been shared, and the poorest farm on rain.

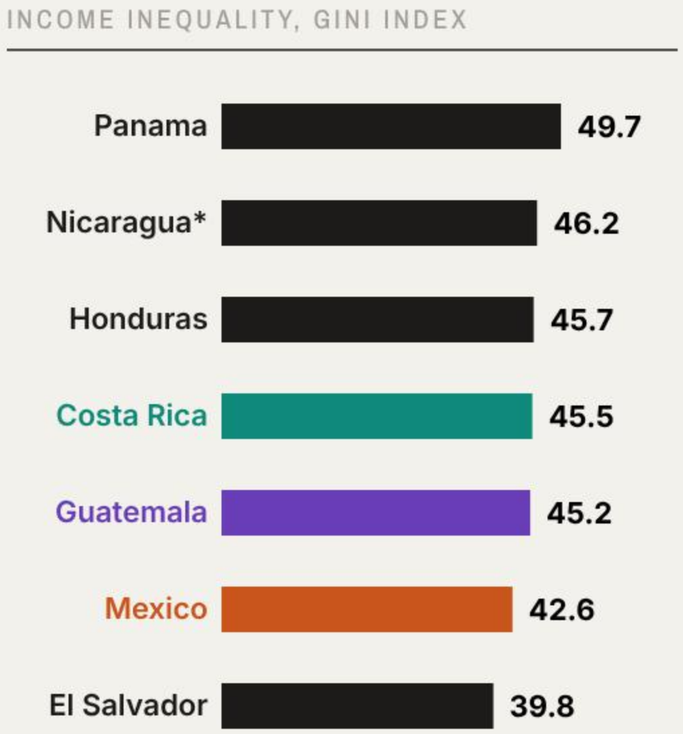

Income inequality and the share of jobs in agriculture.

~30%

OF JOBS IN GUATEMALA AND NICARAGUA ARE IN FARMING, EXPOSED TO DROUGHT IN THE DRY CORRIDOR

KEY

Guatemala, Honduras, El Salvador and Nicaragua share the Dry Corridor, where most farming depends on rain and droughts recur.

has anyone in or near the region broken these walls?

WDI SI.POV.GINI, latest year 2023 to 2025 (Nicaragua 2014) · WDI SL.AGR.EMPL.ZS, 2025 (ILO modelled) · Dry Corridor: FAO and WFP regional assessments

Costa Rica grew on skills. Panama grew without inclusion.

Two neighbours that broke the pattern, in opposite ways.

44%

OF COSTA RICA'S GOODS EXPORTS IN 2024 WERE MEDICAL DEVICES, WITH ALMOST NO R&D OR PATENTS

KEY

Panama grew fastest, on canal and financial services, but collects the least tax and leaves most workers informal.

	COSTA RICA	PANAMA
Growth a year since 1990	**2.7%**	**3.8%**
R&D, % of GDP	**0.34**	**0.20**
Tax, % of GDP	**24.9**	**11.9**
Informal jobs	**37%**	**59%**
Gini index	**45.5**	**49.7**

same geography, opposite choices, opposite results

WDI NY.GDP.PCAP.KD, GB.XPD.RSDV.GD.ZS, SI.POV.GINI · Revenue Statistics in LAC 2025 · ILOSTAT · PROCOMER 2025

Each constraint has already been broken, close to home.

Three precedents, one for each programme, each a narrow mandate held for a long time.

3

PRECEDENTS. A CAUTION: COSTA RICA CUT CINDE'S PUBLIC FUNDING IN 2023. THESE INSTITUTIONS NEED A PROTECTED MANDATE

KEY

None of it was luck. All of it was policy, done by a state that did one narrow thing for a long time.

4 → 29

Vietnam · supplier development, 2014 to 2017

Samsung's local tier-1 suppliers rose sevenfold in three years.

Mexico

–90%

Medellín · social urbanism, 2004 onward

Transport and public buildings went to the poorest comunas first. Homicides fell about 90% from 1991.

Northern Triangle

44%

Costa Rica · CINDE, 1982

Targeted investment promotion plus skills: medical devices reached 44% of goods exports.

Capability

none of it was luck. all of it was policy.

UNIDO WP 5/2019 (Tong) · Vietnamese Ministry of Industry and Trade 2017 · Medellín city data, 99% Invisible · PROCOMER 2025

Mexico: link the export plants to local firms, and lift the payroll wedge.

Pay for the two steps of Perroux's growth pole that markets skip.

<30%

DOMESTIC SHARE OF INPUTS IN MEXICO'S EXPORT FACTORIES: THE NUMBER THIS PROGRAMME MOVES

KEY

Formalisation: move health and pensions from wages to general revenue, so firms can grow into suppliers. Modelled net cost: 0.34% of GDP.

LINKAGES: PAY FOR THE TWO STEPS MARKETS SKIP

01	02 · FUND	03	04	05 · FUND
A big factory arrives	**Local firms learn to supply it**	Skills spread	It runs on its own	**Roads reach the towns outside**

Formalisation: move health and pensions from wages to general revenue, so firms can grow into suppliers. Modelled net cost: **0.34% of GDP**.

PILOT

Nuevo León pole to Chiapas

IDB INSTRUMENT

Investment loan, IDB Invest supply-chain finance, then a policy-based loan

MEASURED BY

Domestic share of export inputs, now under 30%

record investment is landing in Mexico now. linkages decide what it builds.

Perroux's growth pole · Vietnam supplier development (UNIDO 2019) · Antón, Hernández and Levy (2012), IDB · IDB border integration programme

Northern Triangle: build the state first, then connect the towns.

Revenue, security and connectivity, in that order.

14%

GUATEMALA'S TAX TAKE. EVERY OTHER FIX IS PAID FOR FROM THIS BASE

KEY

Broader VAT base and e-invoicing first. A security component in every corridor. Roads, power and broadband to lagging towns.

REVENUE

14.0%

tax take, Guatemala, 2023

Broader VAT base and e-invoicing

SECURITY

25.3

homicides per 100k, Honduras, 2024

A security component in every corridor

CONNECTIVITY

88.7%

electricity access, Nicaragua, 2024

Roads, power and broadband to lagging towns

PILOT

Guatemala first

IDB INSTRUMENT

Policy-based loan for revenue, investment loans for corridors

MEASURED BY

Tax take, homicides, travel time to the nearest town

every other fix is paid for from this base

Revenue Statistics in LAC 2025 · InSight Crime 2024 · WDI EG.ELC.ACCS.ZS · precedent: Medellín social urbanism

Across the region: an agency that proves new industries, then leaves.

Fund an agency that proves a new product works, hands it to firms, and makes itself unnecessary.

US$35m

THE IDB LOAN THAT FUNDED COSTA RICA'S INNOVATION AND SKILLS PROGRAMME (CR-L1043, 2012): OUR SIZING BENCHMARK

KEY

Blue is public money, orange is private firms. The agency's whole job is to make itself unnecessary.

WHO CARRIES THE RISK, OVER TIME

AGENCY PROVES IT → HANDS IT TO FIRMS → AGENCY LEAVES

MODEL

CINDE, Costa Rica, 1982

PILOT

One Mexican export state, then the isthmus

MEASURED BY

Two new export products by year five

factories are leaving China right now. they have to land somewhere.

Vernon 1966 · Hausmann and Rodrik 2003 · precedents: CINDE Costa Rica, Fundación Chile · IDB project CR-L1043

The cheap, visible programme goes first.

Ten years, three programmes. Each one earns the credibility the next one spends.

2

YEARS TO THE FIRST VISIBLE RESULT: LOCAL SUPPLIERS CERTIFIED IN MEXICO

KEY

Each band begins only once the one before it has shown something. Timeline illustrative; gates to be calibrated with the IDB country teams.

TEN YEARS, THREE PROGRAMMES

1 · Year 2 first certified local suppliers

2 · Year 3 Guatemala's tax up one point

3 · Year 5 first new export product

a plan that ignores the electoral calendar never happens

Timeline illustrative · gates to be calibrated with the IDB country teams

We promise three counts, not a growth rate.

Published every year, each with a baseline and a fair comparator.

3

COUNTS. TOP RISK: A US TRADE OR REMITTANCE SHOCK. PROGRAMME THREE ALSO TARGETS NON-US BUYERS

KEY

Solid dots are where we are. Hollow dots are where we are aiming. Target levels to be set with the IDB country teams.

THE THREE COUNTS, WITH BASELINES · SOLID = TODAY · HOLLOW = WHERE WE ARE AIMING

Linkages · Mexico

●○○○○

<30%

domestic share of export-factory inputs, 2024

Against Vietnam's 20% to 25% localisation

Formal jobs · Mexico

●●○○○

55.5%

of workers informal

Against Costa Rica, 37.4%

State capacity · Guatemala

●○○○○

14.0%

tax take, % of GDP, 2023

Against the LAC average, 21.3%

a number we cannot defend is worth less than an honest blank

Baselines: INEGI IMMEX, ILOSTAT, Revenue Statistics in LAC 2025 · targets set with the IDB country teams

Fund linkages and formalisation. In Mexico. Starting in 2027.

Record investment is landing in Mexico now. Linkages decide whether it builds capability or only assembly lines.

Months 0 to 3
Supplier scan in two corridors

Months 3 to 9
Design the supplier programme, prepare the loan

Months 9 to 12
Loan approval; formalisation groundwork

sixty-four years is long enough to wait for the second attempt

APPENDIX

Formalisation: the evidence, and the counterarguments

0.9% to 1.44%

OF GDP EVERY YEAR

Levy's estimate of the static efficiency cost of Mexico's formal-informal wedge (Levy, 2008).

0.34%

OF GDP, NET FISCAL COST

Antón, Hernández and Levy (2012, IDB): universal social insurance funded from general revenue, a uniform 16% VAT, and compensation for poor households.

Brazil's SIMPLES: three studies, three answers

Fajnzylber, Maloney and Montes-Rojas (2011)	**Large**
Monteiro and Assunção (2012)	**Limited**
Piza (2018)	**None**

Simplifying paperwork alone is not enough, so programme one removes the wage wedge itself.

COUNTERARGUMENTS WE CONSIDERED

“It is geography.”	Costa Rica shares the geography, and it is the outlier on almost every indicator on slide 3.
“It is corruption.”	It is a component of weak state capacity, rather than a separate cause.
“Nearshoring will fix it.”	Mexico's record 2025 FDI was 67.7% reinvested earnings and only 18% new investment, and assembly without linkages repeats the maquila pattern.

Levy (2008), Brookings · Antón, Hernández and Levy (2012), IDB · Fajnzylber et al. (2011) · Monteiro and Assunção (2012) · Piza (2018) · Secretaría de Economía, RNIE, 2025 FDI composition
