ISA Data Fluency

IMBA Session 4

"The effectiveness of data visualization can be gauged by its simplicity, relevancy, and its ability to hold the user's hand during their data discovery journey." –Jagat Saikia

Professor Christina Stathopoulos, September 2026

Tool Intro

Data is split into 2 categories of fields:

Dimensions

Unaggregated data.
Can be any kind of data, but typically categories of data, things like names, descriptions or other characteristics that describe the data.

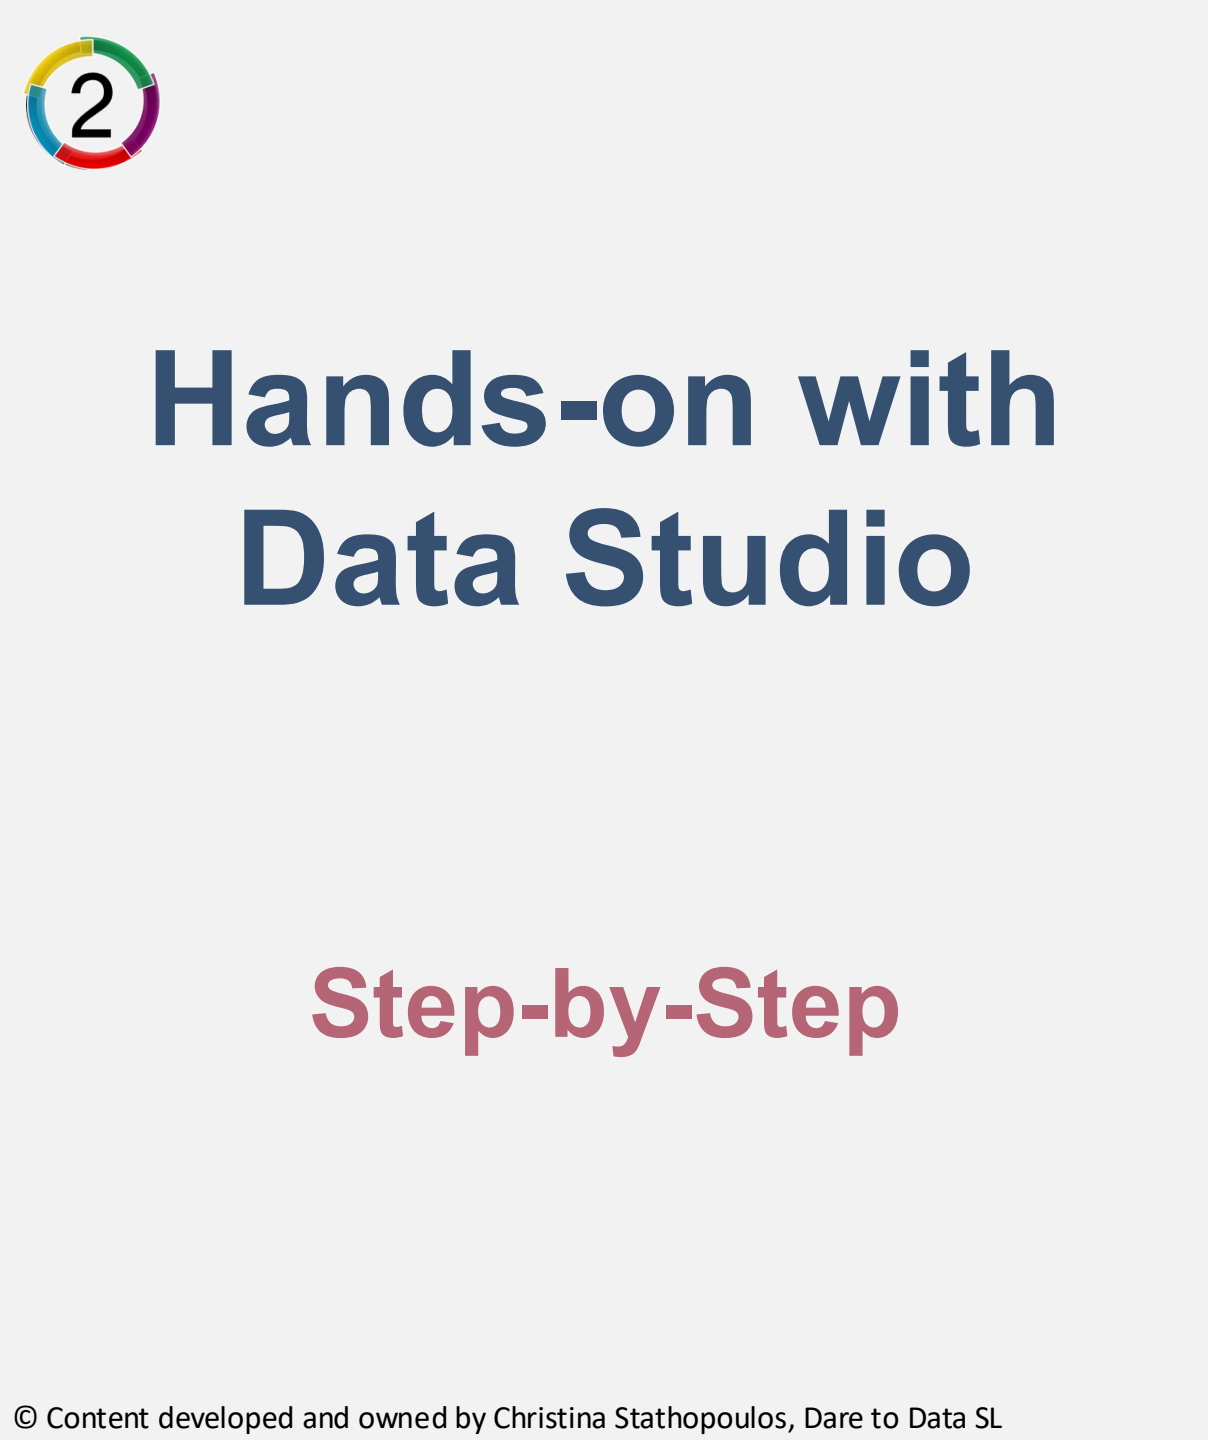

Metrics

Aggregated data.
Numeric data that measures the values of dimensions, these measurements can be sums, counts, ratios, averages, etc.

Data is also assigned a '**type**': Numeric, Text, Date and Time, Boolean, Geo, Currency or URL.

Please open…

1. the dashboard you created in the pre-work (go to datastudio.google.com)
2. copy of the dataset saved in your Google Drive
3. my dashboard (link shared via Blackboard this morning)

Feel free to stay in touch!

(I've reached the 30K connection limit on LinkedIn unfortunately, so until I can get that back down, you can follow me there!)
